

A detailed 3D cutaway rendering of the Muskrat Falls Hydroelectric Generating Facility. The image shows a cross-section through the intake and powerhouse. At the top, a yellow crane is positioned on a platform. Below it, a large concrete structure houses the powerhouse, which is filled with complex machinery, including pipes, valves, and structural steel. The central feature is a large turbine with a prominent vertical shaft and a large, multi-bladed runner. The entire structure is set against a backdrop of a blue sky with light clouds and a dark, rocky landscape. The rendering is highly detailed, showing various components like the intake structure, powerhouse, and the surrounding environment.

Cross-section Through Intake/Powerhouse
